

Application notes Smart Beacon Go 500 waterproof

General

The Smart Beacon Go 500 is also available with a waterproof cover on request (MOQ: 100 pieces). These application notes, explain the extended or changed product properties. Thanks to the friction welded housing the IP protection class IP68 is achieved. A combination with accessories such as key fob, clip or drop is not possible and the pushbutton can also not be used. All other changes are explained below:

Intended Use

Smart Beacons are Bluetooth transmitters that send a unique ID to surrounding devices at certain intervals. They are used to identify places and objects.

- This document is part of the product. It contains important information for installation and operation. Store it carefully.
- Any other use than described in these instructions is not permitted. The manufacturer assumes no liability for personal injury or damage resulting from improper use.
- The product must not be modified
- If the product is damaged, it may no longer be used.
- Only operate the device within the technical specifications.
- The product must not be exposed to strong mechanical loads.
- The beacon must be protected from strong heat.
- Do not operate the device near flammable gases and vapours.
